

## HOW TO DETERMINE A RING SIZE

*Please carefully read all instructions to ensure the accuracy of the measurement.*

### CONFIRM PRINTED PAPER SIZE

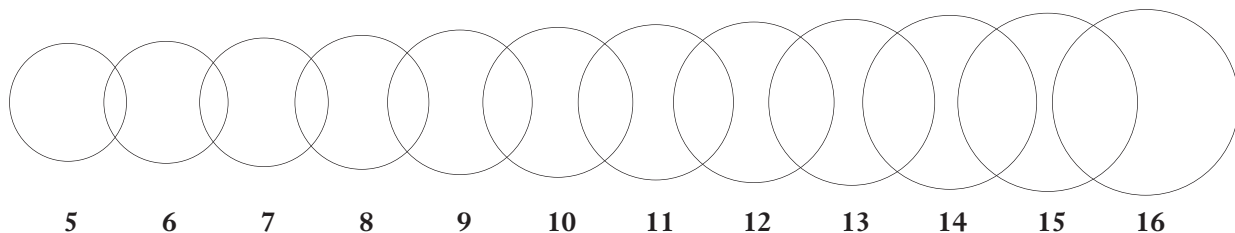

1. Before printing, ensure that page scaling is set to "None" on your print dialog box.
2. Measure the bar on the left to ensure it is exactly one inch long.
3. If measurement is not accurate, check that you are printing the page at full size and reprint before continuing.
4. If you are still having trouble with the measurement, call us at 1-800-243-4664 and we will send you a ring sizer.

To find the proper size, choose one of the options below:

(Note: You should check online to determine the availability of your size. Not all sizes are offered for certain styles.)

### Option A:

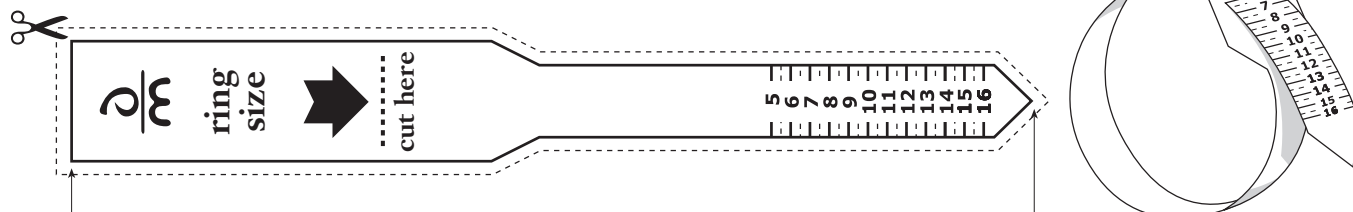

1. Select a ring that properly fits the intended finger.
2. Match a circle with the inside of a ring (a band works best for measuring).

If your ring falls between two sizes, this indicates a half size. Check to see if half sizes are available for the ring you are ordering. If not, order the larger size.

### Option B:

1. Cut out the ring sizer below along the dotted line.
2. Create a slot by cutting along the dotted line next to the arrow labeled "your ring size."
3. Wrap the sizer around the intended finger and slide the pointed end of the sizer through the slot.
4. Pull the pointed end so that the sizer fits comfortably to ensure an accurate size measurement.
5. Find the number that lines up with the arrow. The arrow will point to the size needed.

When printed at 100%, this length should measure 5". If the arrow falls between two sizes, this indicates a half size. Check to see if half sizes are available for the ring you are ordering. If not, order the larger size.
